

## Fractional CISO / Virtual CISO & Security Advisory

### BENEFITS

Most small-to medium-sized businesses (SMBs) hiring a CISO may be challenging business decision to find a suitable and affordable candidate and the impacts of cyber-breach to the SMBs can be devastating since many of those businesses are unable to sustain the costs of a breach.

- A virtual Chief Information Security Officer, or vCISO, or CISO as a Service (CISOaaS), can provide the expertise needed to ensure your information security, privacy programs are succeeding and your company is prepared to analyze a breach, all at a cost-effective price.

### SUBSCRIPTION BASED APPROACH – VCISO AS A SERVICE

- By choosing a virtual CISO, you can rely on our experts to monitor your Information Security on a subscription basis. In addition, you can tailor your Information Security service to your organization's needs and increase scale as necessary.
- vCISO has a knowledge necessary that cyber security needs of your organization are met.
- With our expertise, DISC can provide tailored solutions that fit your goals to provide an optimal coverage with transparency and defined deliverables to minimize your costs. While knowing top security experts are looking after your Information Security needs. vCISO is your virtual teammate, who can assist you for fixed number of hours or on a retainer.

- **Experts at your Disposal** : Our Security expert's pedigree:
  - Collective industry experience of 40+ years for our Principals
  - BIG4 and Professional services experience
  - Global cyber security industry experience across broad range of industries.
  - Hold various industry designations CISSP, CPA, CISM, CPP, CEH, PMP to name a few
- **Cost-effective**: on average if you take the salary of a C-level executive versus hiring a vCISO can definitely reduce your costs and save on-boarding time of a new employee. This will generally translate into saving **55%** savings compared to full time CISO and faster delivery of critical security objectives.
- **Scalable solutions**: By leveraging our Security experts with collective experience of over 60+ years of our Principals. You can take advantage of our wealth of experience building and operationalizing Security programs for global organizations to meet their Security objectives in all facets of Information Security to translate into meeting your organizational objectives.
- **Fast response times**: By using a team solely responsible for Information Security, rather than all of IT functions, response times will be much faster. The vCISO will monitor on a regular basis progress and roadblocks and react in timely manner to meet your organizational needs. Providing the much needed relief in bandwidth to run the business, which is your main focus?
