ISO/IEC 42001: Responsible AI Governance in Practice

A one■page view of why ISO 42001 matters, how ShareVault achieved certification, and how DISC InfoSec enables successful outcomes.

What ISO 42001 Is

The world's first AI Management System standard. It defines how organizations govern AI across its lifecycle—risk, transparency, accountability, and continuous improvement.

Why It Matters

• Demonstrates responsible and ethical AI use
• Builds customer and regulator trust
• Reduces AI■related operational and compliance risk

Case Study: ShareVault

ShareVault became one of the first virtual data room providers to achieve ISO 42001 certification—setting a new benchmark for AI governance in high■trust environments.

DISC InfoSec Contribution

• Internal audit and readiness assessment
• AI lifecycle and risk governance evaluation
• Stage 1 and Stage 2 audit preparation support

How ISO 42001 Fits Your Compliance Stack

ISO 42001 integrates naturally with ISO 27001, SOC 2, and NIST■aligned programs—extending governance from information security into AI systems.

Need ISO 42001 Expertise?
DISC InfoSec provides practical, audit■ready guidance for AI governance.
