

Expert AI Governance and Cybersecurity Consulting

Strengthening B2B SaaS and Financial Services with Robust Compliance Frameworks

Deura Information Security Consulting LLC provides expert guidance for B2B SaaS and financial services companies seeking to establish practical and defensible security and AI governance programs. We specialize in transforming compliance from a theoretical exercise into an operational reality. Our approach ensures your organization not only meets but exceeds industry standards, building significant customer trust and reducing risk.

Comprehensive AI Governance Services

In an era defined by artificial intelligence, robust governance is not optional. We offer specialized **ai governance services** to help your business navigate the complexities of AI ethics, accountability, and regulatory requirements. Our consultants implement frameworks that align with your strategic objectives, ensuring responsible and secure AI deployment. We focus on creating sustainable programs that stand up to rigorous scrutiny from auditors and stakeholders.

Mastering NIST AI RMF Compliance

Achieving **nist ai rmf compliance** is critical for organizations looking to manage risks associated with artificial intelligence systems. Our team provides hands-on consulting to implement the NIST AI Risk Management Framework, helping you identify, assess, and mitigate AI-related risks effectively. We guide you through every step, from building the initial framework to preparing for audits, ensuring your AI systems are trustworthy and secure.

Our Core Consulting Expertise

Deura Information Security Consulting LLC delivers tangible results through a suite of specialized services designed for the modern digital landscape. We move beyond simple documentation, building functioning programs that produce the evidence required for successful certification.

- **ISO 27001 & ISO 42001 Consulting:** We guide companies to successful certification with a practitioner-led approach, including first-audit ISO 42001 certification.

- **vCISO and vCAIO Services:** Access executive-level security and AI leadership from our CISSP and CISM certified consultants with over 20 years of experience.
- **SOC 2 Readiness:** We prepare your organization for SOC 2 audits by building robust security controls and operational procedures.
- **Holistic Security Programs:** Unlike firms that treat compliance as a checkbox, we integrate security and AI governance into the core of your operations.

Specialized AI Compliance Solutions

- **ISO 42001 Consulting:** Achieve certification for the first international standard for AI Management Systems. Our **ISO 42001 consulting** service helps implement a framework for responsible AI development and deployment.
- **NIST AI RMF Compliance:** Align your AI governance program with the National Institute of Standards and Technology's framework. We facilitate **NIST AI RMF compliance** to manage the risks associated with AI technologies.
- **EU AI Act Compliance:** Prepare for the future of AI regulation. Our consulting for **EU AI Act compliance** ensures your organization is ready to meet the requirements of this landmark legislation.

Why DISC InfoSec

Independent AI Governance & Security Expertise - 20+ years in regulated environments. We translate AI risk into clear **board, legal, and regulatory language—without vendor bias**. In two weeks, we show leadership where AI risk lives, who owns it, and what must be fixed before AI becomes a liability

Timeline **14 calendar days from kickoff to executive briefing:**

Day 1–2: Kickoff + scoping | Day 3–10: Analysis & mapping | Day 11–13: Risk synthesis
Day 14: Executive debrief
